

## Manufacturer's Certification Statement

for the 2011 Federal Tax Credits for Consumer Energy Efficiency

On December 17, 2010, President Obama signed the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010. The law extends the tax credits for energy efficiency into 2011, BUT at lower levels. The levels revert back to those in effect in 2006 and 2007, which were 10% of the cost of the improvement, up to \$500, for insulation.

There is a \$500 lifetime limit. If you got over \$500 in these tax credits from 2006 - 2010, you are not eligible for anything more. The tax credit expires on December 31, 2011 and is only available for an existing home and your principal residence. New construction and rentals do not qualify.

Henry Company certifies that the foam insulation products and systems listed below qualify for the Federal Tax Credit.

- PERMAX® RT-2045-Series (1.8# & 2.0#) Spray Foam Wall Insulation Systems
- PERMAX® RT-3090-Series (0.5#) Spray Foam Wall Insulation Systems
- PERMAX® RT-2035-Series (2.5# & 3.0#) Spray Foam Roof Systems

Under penalties of perjury, I declare that I have examined this certification statement, and to the best of my knowledge and belief, the facts are true, correct and complete.

# 2011 Federal Tax Credits for Consumer Energy Efficiency

## Tax credits for consumers:

### Home Improvements

Tax credits are now available for home improvements:

- Must be "placed in service" from January 1, 2011 through December 31, 2011
- Must be for taxpayer's principal residence
- \$500 is the maximum total lifetime limit that can be claimed for all products placed in service for most home improvements, EXCEPT for geothermal heat pumps, solar water heaters, solar panels, fuel cells and wind generators
- Must have a Manufacturer Certification Statement to qualify
- For record keeping, save your receipts and the Manufacturer Certification Statement
- Improvements made in 2011 will be claimed on your 2011 taxes (filed by April 15, 2012) — use IRS Tax Form 5695
- If you are building a new home, you can qualify for the tax credit for geothermal heat pumps, photovoltaics, solar water heaters, small wind systems and fuel cells, but not the tax credits for windows, doors, insulation, roofs, HVAC, or non-solar water heaters.

## SUMMARY OF TAX CREDITS FOR HOMEOWNERS – INSULATION

Product Category	Product Type	Tax Credit Specification	Tax Credit	Notes
Insulation	Insulation	Meets 2009 IECC & Amendments	10% of cost, up to \$500	For insulation to qualify, its primary purpose must be to insulate. (example: vapor retarders are covered, insulated siding does not qualify). Must be expected to last 5 years OR have a 2 year warranty
