

Henry Blueskin PreSeal™

Pre-Applied Waterproofing System

⦿ Proven protection

A fully and permanently bonded sheet membrane backed by **more than 20 million** installed square feet outside North America.

⦿ Lightweight rolls simplify installation

Rolls are easy to transport, cut and position, making installation fast and easy.

⦿ Wide rolls with fewer seams

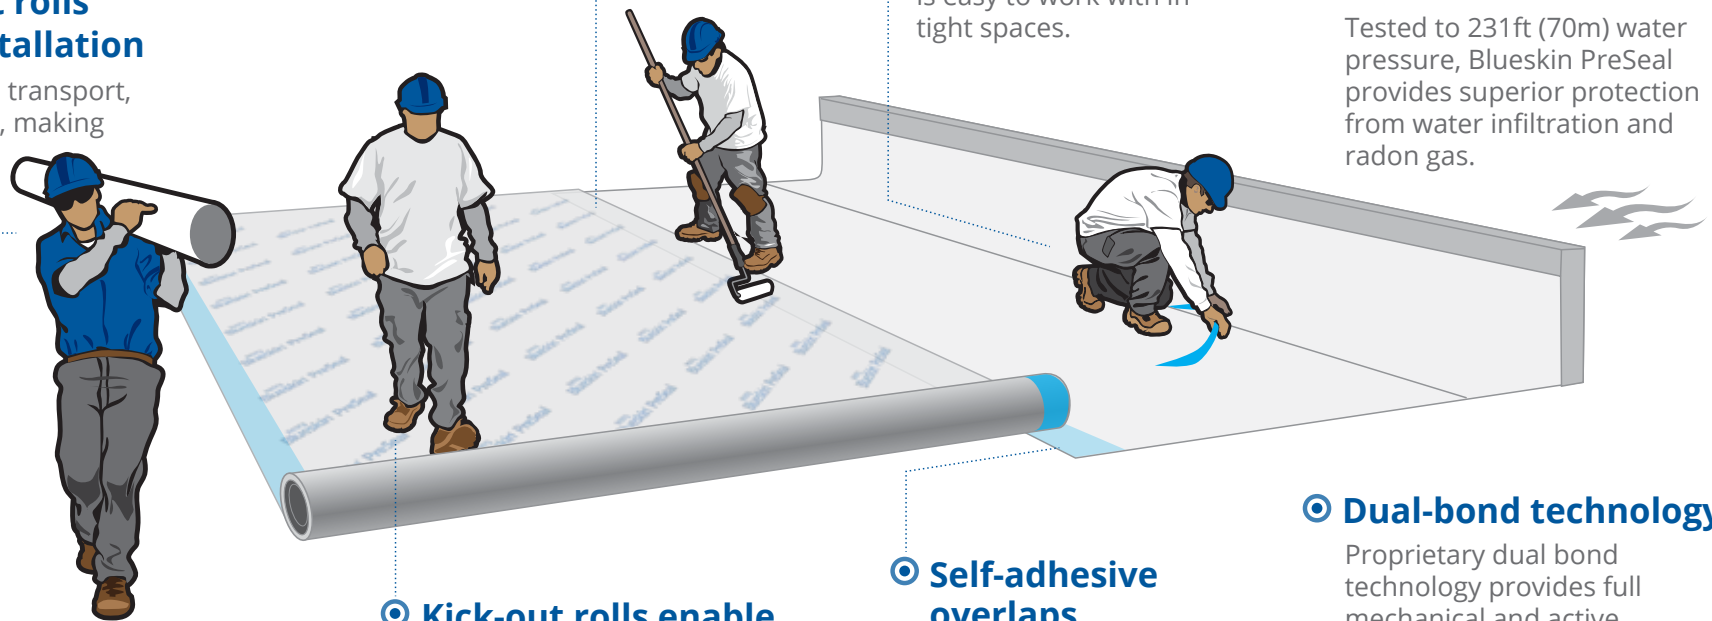

6.6' (2m) wide membrane rolls mean fewer seams for less risk of water infiltration.

⦿ Easy to detail

Polypropylene membrane is easy to work with in tight spaces.

⦿ Impervious to water and radon

Tested to 231ft (70m) water pressure, Blueskin PreSeal provides superior protection from water infiltration and radon gas.

⦿ Kick-out rolls enable faster installation

Rolls can be easily "kicked out", improving labor performance and installation speed.

⦿ Self-adhesive overlaps

Self-adhering laps and splices make mounting stable and secure, without tools or torches.

⦿ Dual-bond technology

Proprietary dual bond technology provides full mechanical and active chemical adhesion to concrete and is unaffected by poor soil conditions.
