

Don't get blindsided by below grade leaks

Henry® Company AIA Accredited Continuing Education Presentation

Course description

Learn to avoid below grade leaks with this in-depth presentation about pre-applied waterproofing systems. This course reviews blindside waterproofing and best installation practices, when installed in vertical and horizontal below grade applications, to ensure leak-free and warrantable installations.

Enjoy an engaged discussion, find out which system is right for your project, and ask project specific questions in the comfort of your office!

Learning objectives

- Learn about industry recognized pre-applied waterproofing technologies and common pre-applied waterproofing components
- Identify best installation practices to avoid below grade leaks
- Examine common substrate concerns and critical details
- Understand quality control requirements
- Review warranty options

This presentation is a one-hour discussion and qualifies for continuing education credit as recognized by the American Institute of Architects as follows:

Learning unit(s): 1 LU/HSW
