

Vegetative Roof Assembly - Achieving High Performance Protection

Henry® Company AIA Accredited Continuing Education Presentation

Course description

As population densities increase, cities are adopting vegetative roofing assemblies (VRA) as part of their mandated code compliance to manage storm water runoff and decrease seasonal flooding. Learn how to create a visually appealing design, while managing client expectations, to obtain a project specific vegetative roofing assembly and maintain a watertight building envelope.

Enjoy an engaged discussion, find out which system is right for your project, and ask project specific questions in the comfort of your office!

Learning objectives

- History of vegetative roofing assemblies
- Physical properties of a vegetative roofing assembly
- Waterproofing options associated with a vegetative roofing assembly – a system approach
- Design and installation considerations
- Code compliance
- The future of vegetative roofing assemblies

This presentation is a one-hour discussion and qualifies for continuing education credit as recognized by the American Institute of Architects as follows:

Learning unit(s): 1 LU/HSW Provider number: J557 Program number: VRA790

Henry® Company is a proud member of the American Institute of Architects and offers a variety of accredited continuing education seminars. To schedule a presentation, contact your local Henry® representative or Henry® Product Support: 1-800-486-1278 or ProductSupport@henry.com.
